CONTENTS

Volume 18, Issue Nos. 1–12 (1982)

International Journal for

NUMERICAL METHODS IN ENGINEERING

Issue No. 1

Application of the Boundary Integral Equation Method to Reissner's Plate Model: F. Vander Weeën 1

Dispersion Analysis of Finite Element Semidiscretizations of the Two-dimensional Wave Equation: R. Mullen and T. Belytschko 11

A Note on the Singularity and the Strain Energy of Singular Elements: L-A. Ying . . 31

Discrete Transfinite Mappings for the Description and Meshing of Three-dimensional Surfaces Using Interactive Computer Graphics: R. Haber and J. F. Abel 41

Loubignac's Iterative Method in Finite Element Elastostatics: R. D. Cook 67

Finite Element Operators: Inexpensive Evaluation of Upwind Schemes: J. S. Hansen and A. H. von Flotow 77

Analytical Selection of Masters for the Reduced Eigenvalue Problem: V. N. Shah and M. Raymund 89

Investigation of Highly Accurate Integration Formulae for Transient Heat Conduction Analysis Using the Conjugate Gradient Method: D. M. Trujillo and H. R. Busby . 99

Solving the Model of Isothermal Reactors with Axial Mixing by the Differential Quadrature Method: K-M. Wang 111

An Efficient Algorithm for Analysis of Nonlinear Heat Transfer with Phase Changes: W. D. Rolph III and K-J. Bathe 119

A Finite Element Model for Nonlinear Shells of Revolution: W. A. Cook 135

SHORT COMMUNICATIONS

Effects of Internal Finite Element Node Placement on Field Problem Solutions: H. G. Kraus 151

An Analysis of Alternatives for Computing Axisymmetric Element Stiffness Matrices: J. A. Palacios and M. Henriksen 161

BOOK REVIEWS 165

ANNOUNCEMENT 166

Indexed or abstracted by 'Current Contents', 'Science Citation Index' and other leading Indexing/Abstracting Services.

Issue No. 2

Boundary Layer Refinements in Convective Diffusion Problems: A. Kanarachos . . 167

Direct-iterative Solution of Ill-conditioned Finite Element Stiffness Matrices: S. Gen-Hua 181

Reduced Integration and the Shear-flexible Beam Element: G. Prathap and G. R. Bhashyam 195

A Mixed Formulation and Mixed Finite Elements for Limit Analysis: R. Casciaro and L. Cascini 211

A Direct Automated Procedure for Frictionless Contact Problems: F. F. Mahmoud, N. J. Salamon and W. R. Marks 245

Hybrid Stress Finite Element Analysis of Bending of a Plate with a Through Flaw: H. C. Rhee and S. N. Atluri 259

Automatic Mesh Generation with Tetrahedron Elements: Nguyen-van-Phai 273

A Finite Element Model for Plane Elasticity Problems Using the Complementary Energy Theorem: C. V. G. Vallabhan and M. Azene 291

SHORT COMMUNICATIONS

Gauss–Lobatto Integration of High Precision Tetrahedral Elements: A. Peano . . 311

A Warning against Misuse of Quarter-point Elements: A. Peano and A. Pasini . . 314

BOOK REVIEW 321

ANNOUNCEMENTS 321

Issue No. 3

On the Rates of Convergence of the Finite Element Method: I. Babuska and B. Szabo 323

A Smoothing Technique for Reduced Integration Penalty Methods in Contact Problems: N. Kikuchi 343

Finite Element Analysis of Rotating Flow in a Skewed Shrouded Rotor Geometry: P. Bar-Yoseph, J. J. Blech and A. Solan 351

A Family of Conforming Finite Elements for Deep Shell Analysis: G. Sander and S. Idelsohn 363

An 'Upwind' Finite Element Method via Numerical Integration: G. Payre, M. de Broissia and J. Bazinet 381

A Geodesic Beam Finite Element for Use in the Static Analysis of Reinforced Circular Cylindrical Shells: I. T. Thomas and J. P. H. Webber 397

An Algorithm for Programming the Element Matrices of Doubly Curved Quadrilateral Shell Finite Elements: R. L. Nelson 421

Use of Screw Translational Symmetry for the Vibration Analysis of Structures: G. S. Whiston 435

Three-dimensional Hybrid-stress Isoparametric Quadratic Displacement Elements: R. L. Spilker and S. P. Singh 445

SHORT COMMUNICATIONS

Numerical Solution of Heat Conduction Problems by Parabolic Time–Space Element: L. G. Tham and Y. K. Cheung 467

ANNOUNCEMENTS 475

Issue No. 4

Geometrically Nonlinear Formulation for the Axisymmetric Shell Elements: K. S. Surana 477

Approximate Solution of Singular Integro-Differential Equations in Elastic Contact Problems: T. S. Sankar, S. V. Hoa and V. I. Fabrikant 503

Constraint Relationships in Linear and Nonlinear Finite Element Analyses: J. Barlow 521

A Thermodynamically Consistent Numerical Method for Transonic Cascade Flow Simulation: A. Thyagaraja 535

An Experimental Investigation of the Use of Isoparametric and Rational Basis Elements in a Fluid Flow Problem: P. Keast and G. Woodford 557

Internally Discontinuous Finite Elements for Moving Interface Problems: G. P. Steven 569

Acceleration of Subspace Iteration: F. A. Akl, W. H. Dilger and B. M. Irons 583

Elasto-viscoplastic and Elasto-plastic Large Deformation Analysis of Thin Plates and Shells: L. M. S. Dinis and D. R. J. Owen 591

Semi-implicit Transient Analysis Procedures for Structural Dynamics Analysis: K. C. Park and J. M. Housner 609

SHORT COMMUNICATION

Shape Functions for the Surface Elements with a Prescribed Normal Direction in Nodal Points: V. Kompiš 623

LETTERS TO THE EDITOR 629

BOOK REVIEWS 631

ANNOUNCEMENTS 632

Issue No. 5

Approximate Structural Reanalysis for Optimization along a Line: U. Kirsch 635

Finite Element Computation of Large Rubber Membrane Deformations: I. Fried . . 653

Three-dimensional Shape Optimization: M. H. Imam 661

Optimal Arrangement of Holes in a Two-dimensional Heat Conductor by a Special Boundary Integral Method: M. R. Barone and D. A. Caulk 675

On a Finite Element Model for Solving Dirichlet's Problem of Laplace's Equation: C. Yi-Heng 687

Finite Element Methods for Constrained Problems in Elasticity: J. T. Oden and N. Kikuchi 701

Some Vector Expansion Functions for Quadrilateral and Triangular Domains: E. E. Okon 727

High Order Methods for Elliptic Partial Differential Equations with Singularities: E. N. Houstis and J. R. Rice 737

Some Problems of a Plate Bending Hybrid Model with Shear Effect: C-C. Wu 755

A Finite Element Formulation of Uncoupled Thermoviscoelastic Response of Plane Problems for All Admissible Values of Poisson's Ratio: H. R. Srinatha and R. W. Lewis 765

SHORT COMMUNICATIONS

Numerical Solution of High Order Boundary Value Problems for Ordinary Differential Equations with an Estimation of the Error: P. Onumanyi and E. L. Ortiz . . 775

A Rational Function Approximation for the Integration Point in Exponentially Weighted Finite Element Methods: J. E. Flaherty 782

Round-off Error in the Penalty Finite Element Analysis of Incompressible Continuous Media: P. Bar-Yoseph 792

BOOK REVIEWS 798

ANNOUNCEMENT 799

Issue No. 6

Hybrid-stress Eight-node Elements for Thin and Thick Multilayer Laminated Plates: R. L. Spilker 801

A Receptance Formula for General Second-degree Square Lambda Matrices: A. B. Palazzolo, B. P. Wang and W. D. Pilkey 829

A New Penalty Function Element for Thin Shell Analysis: E. Haugeneder 845

A Direct Vector Combination Procedure for Finite Element Stiffness Matrix Formulation: S. T. Mau 863

Line Node and Transitional Shell Element for Rotational Shells: K. J. Han and P. L. Gould 879

Application of Point Least Squares Method with *B*-Splines in Solid Mechanics Problems: T. Mizusawa and T. Kajita 897

Interactive Computer Graphic Preprocessing for Three-dimensional Finite Element Analysis: R. Perucchio, A. R. Ingraffea and J. F. Abel 909

Plastic Analysis of Torsion of a Prismatic Beam: S. Baba and T. Kajita 927

SHORT COMMUNICATIONS

Automatic Constraining of Linear Dependencies: S. K. Kark and A. Scholes . . . 945

Finite Element Meshes for the Interaction of Soil and Axisymmetric Structures: O. M. El-Shafee and P. L. Gould 949

BOOK REVIEWS 954

ANNOUNCEMENTS 955

Issue No. 7

Some 'Special' Interpolation Formulae for Triangular and Quadrilateral Elements: L-A. Ying 959

Static Analysis of Shallow Shells of Arbitrary Shape—A New Approach: D. Bucco, J. Mazumdar and G. Sved 967

A Comparison of Discretization Methods for the Shallow Water Equations: N. Praagman 981

A Block Equation Solver for Large Unsymmetric Matrices Arising in the Boundary Integral Equation Method: J. M. Crotty 997

Higher Order Accuracy Finite-difference Schemes for Hyperbolic Conservation Laws: A. S. Reddy 1019

The Thermal History of a Composite Cylinder Girth Welded by TIG: A. Grill . . . 1031

Finite Element Analysis of Non-stationary One-dimensional Random Diffusion Problems: S. Tasaka and O. Matsuoka 1045

Universal Finite Element Matrices for Tetrahedra: P. P. Silvester 1055

Estimating Stress Intensity Factors with Singular Components of the Total Finite Element Solution: G. H. Staab 1063

An Explicit Formulation for an Efficient Triangular Plate-bending Element: J-L. Batoz 1077

SHORT COMMUNICATIONS

Minimum Weight Design of a Spherical Shell under a Concentrated Load at the Apex: V. Thevendran 1091

The Optimum Size of Quarter-point Crack Tip Elements: L. P. Harrop 1101

Finite Element Method in Magnetohydrodynamic Channel Flow Problems: B. Singh and J. Lal 1104

ANNOUNCEMENTS 1112

Issue No. 8

Another Kind of Numerical Instabilities of the Integral Approach to the Interior Boundary-value Problem for the Two-dimensional Helmholtz Equation: F. Mattioli 1115

Error Growth in Transient Large Displacement Calculations: J. P. Wright and J. L. *Baylor* 1131

Yale Sparse Matrix Package I: The *Symmetric Codes: S. C. Eisenstat, M. C. Gursky,* M. H. Schultz and A. H. Sherman 1145

Invariant 8-node Hybrid-stress Elements for Thin and Moderately Thick Plates: R. L. Spilker 1153

A Qualitative Accuracy Consideration on Arch Elements: Y. Yamamoto and H. *Ohtsubo* 1179

Band Algorithm for Unsymmetric Matrices *in Finite Element and Semi-discrete* Methods: T. C. Gopalakrishnan and A. B. Palaniappan 1197

A Mixed Variational Principle for Finite Element Analysis: M. L. Day and T. Y. Yang 1213

Displacement Discontinuity Method Applied to Nondestructive Testing Related Stress Problems: L. W. Zachary and B. J. Skillings 1231

SHORT COMMUNICATIONS

Permutation Rules for Simplex Finite Elements: P. P. Silvester 1245

A Splitting Scheme for the Solution of the Heat Diffusion Equation in Cylindrical Co-ordinates: M. M. Shoucri and J. P. Novak 1249

Plane Intersections of a Three-dimensional Mesh: M. Afzali 1253

LETTERS TO THE EDITOR 1260

BOOK REVIEW 1264

ANNOUNCEMENTS *1265*

Issue No. 9

On the Reliability of the Linear Oscillator and Systems of Coupled Oscillators: L. A. Bergman and J. C. Heinrich 1271

Mixed Formulation Finite Elements for Mindlin Theory Plate Bending: S. W. Lee and S. C. Wong 1297

A Seventh-order Numerical Method for Solving Boundary Value Nonlinear Ordinary Differential Equations: R. P. Tewarson 1313

A Moving Petrov–Galerkin Method for Transport Equations: B. M. Herbst, S. W. Schoombie and A. R. Mitchell 1321

A Family of Solution Algorithms for Nonlinear Structural Analysis Based on Relaxation Equations: K. C. Park 1337

Dynamic Programming in Minimum Weight Design of Shells: V. Thevendran 1349

Time Domain Approximations in the Solution of Fields by Time Domain Diakoptics: P. B. Johns and K. Akhtarzad 1361

Singular Cubature over Triangles: J. A. Liggett 1375

Swirl Flow Studies in Diffusers Using the Flux Analysis Method with Orthogonal Curvilinear Coordinates: S. Uchida, Y. Nakamura and T. Kondo 1385

SHORT COMMUNICATIONS

The Potential Due to a Uniform Source Distribution over a Triangular Domain: E. E. Okon and R. F. Harrington 1401

Integration of Exponential Expressions in Natural Co-ordinates over Finite Elements: M. F. N. Mohsen 1412

A Remark on the Direct Numerical Determination of Stress Intensity Factors at Crack Tips: N. I. Ioakimidis 1416

LETTERS TO THE EDITOR 1420

BOOK REVIEWS 1423

ANNOUNCEMENTS *1425*

Issue No. 10

Mixed Models and Reduced/Selective Integration Displacement Models for Nonlinear Shell Analysis: A. K. Noor and C. M. Andersen 1429

A Family of Hybrid Plate Elements: P. Tong 1455

On Computational Procedures for the Force Method: I. Kaneko, M. Lawo and G. Thierauf 1469

An Integral Equation Method for the Diffraction of Oblique Waves by an Infinite Cylinder: P. L-F. Liu and M. Abbaspour 1497

A Linear Finite Element Approach to the Solution of the Variational Inequalities Arising in Contact Problems of Structural Dynamics: D. Talaslidis and P. D. Panagiotopoulos 1505

Errors in Natural Frequency Calculations Using Eigenvalue Economization: D. L. Thomas 1521

Block-indexed Solution of Very Large Linear Equation Systems with Symmetric DBBF Coefficient Matrix: M. M. Stabrowski 1529

Free Surface Seepage from Nonsymmetric Channels: J. Remar, J. C. Bruch Jr. and J. M. Sloss 1547

SHORT COMMUNICATIONS

On the Displacement Formulation of Torsion of Shafts with Rectangular Cross-sections: K-J. Bathe and A. Chaudhary 1565

Uniform Rational Approximation on Large Data Sets: E. H. Kaufman Jr., S. F. McCormick and G. D. Taylor 1569

Control of Spurious Modes in the Nine-node Quadrilateral Element: R. D. Cook and F. Zhao-Hua 1576

BOOK REVIEWS 1581

ANNOUNCEMENTS 1583

Issue No. 11

A Simple Yet Accurate Finite Element Procedure for Computing Stress Intensity Factors: G. B. Sinclair and D. Mullan 1587

A Strategy for the Solution of Soil Dynamic Problems Involving Plasticity by Transform: W. Matthees 1601

On Some Unconditionally Stable, Higher Order Methods for the Numerical Solution of the Structural Dynamics Equations: V. A. Dougalis and S. M. Serbin 1613

A Partitioned Frontal Solver for Finite Element Analysis: G. Beer and W. Haas . . . 1623

Evaluation of a New Quadrilateral Thin Plate Bending Element: J-L. Batoz and M. Ben Tahar 1655

Alternative Ways for Formulation of Hybrid Stress Elements: T. H. H. Pian and D-P. Chen 1679

A Semi-analytical Method for the Post-local-torsional Buckling Analysis of Prismatic Plate Structures: S. Sridharan 1685

Second-order Design Sensitivity Analysis of Mechanical System Dynamics: E. J. Haug and P. E. Ehle 1699

Rapid Crack Propagation and Arrest in the DCB Specimen—An Improved Numerical Analysis: M. Perl 1719

SHORT COMMUNICATIONS

On a Differential Equation Occurring in Structural Mechanics: A Simple Aid to Computing: W. H. Wittrick 1733

Computation of Eigenvalues Using Two-point Boundary Value Problem Codes: B. Edwards 1736

BOOK REVIEWS 1739

ANNOUNCEMENTS 1741

Issue No. 12

Considerations of Core Storage Arising from the Finite Element Analysis of Radiation Diffusion–Transport Benchmark Problems: A. K. Ziver, A. J. H. Goddard and R. T. Ackroyd 1745

A Finite Boundary Method for Fluid Flow Field Computations: V. Ponnuswamy . . 1765

A Family of Methods with Three-term Recursion Formulae: M. Papadrakakis. . . . 1785

Fourier Series Solution for a Rectangular Thick Plate with Free Edges on an Elastic Foundation: D. J. Henwood, J. R. Whiteman and A. L. Yettram 1801

The Potential Integral for a Linear Distribution over a Triangular Domain: E. E. Okon and R. F. Harrington 1821

Numerical Operational Methods for Time-dependent Linear Problems: G. V. Narayanan and D. E. Beskos 1829

Limitations and Possible Extensions to a Nonlinear Finite Element Shell-of-Revolution Model Based on Reissner's Shell Theory: W. A. Cook 1855

SHORT COMMUNICATION

Implicit Time Integration of Elasto-viscoplastic Solids Subject to the Mohr–Coulomb Yield Criterion: F. Damjanić and D. R. J. Owen 1873

ANNOUNCEMENTS 1882

Author Index 1887
